testNavigationFromLoginToSignup	Verify navigation from login to signup page	PASS
testNavigationFromSignupToLogin	Verify navigation from signup to login page	PASS

➤ Test Environment

Component	Specification
OS	Windows
Java Version	21
Testing Framework	JUnit Jupiter 5.10.2
Browser Simulator	HtmlUnit 4.21.0
Backend	PHP 8.x with MySQL
Web Server	XAMPP (Apache)
Base URL	http://localhost/ecommerce_api/frontend/

➤ Conclusion

All 18 tests passed successfully (100% pass rate). The admin panel is functioning correctly with:

- Proper authentication UI
- Complete CRUD operation forms
- Admin-side validation working (negative values rejected, empty names rejected)
- Inventory view functionality working
- Navigation between all pages working

The system is ready for deployment or further testing.
